210 copies printed @ \$0.08 each for a total cost of \$16.80

What Is Being Done?

Improving the M-311 (11 Mile Road) ramp to westbound I-94, extending the M-96 (Michigan Avenue) left-turn lane from Wheatfield Parkway to M-311, and sealing cracks on I-94 between M-96 and M-311.

When Will This Be Done?

Work is expected to start in May and be completed in August.

How Will Traffic Be Affected?

The project will require short-term nighttime single-lane and ramp closures on I-94. At least one lane of I-94 will be open at all times.

Long-term Benefits

The new ramp will allow for safer merging onto westbound I-94, and the center-turn lane on M-96 will ease traffic flow. Crack sealing on I-94 will extend the pavement life and improve ride quality.

MDOT's 2012 road and bridge program supports the creation of jobs, growth of the economy, preservation of the environment and the safety and security of the transportation system.
